## The scoop of the day Happy Holidays to All!

The end of the year brings a special time to say Thank You to those that have been so kind and thoughtful in one's journey.

I would like to say Thank You for your support in the past and hope to be of service in the future.

Our focus on Interventional Pain allows us to focus on the patients pain generator and bring about effective treatment.

Our new Medicare Certified C-Arm equipped Ambulatory Surgery Center allows the quick and convenient delivery of state-of-the-art pain treatment procedures. This ranges from effective, comfortable, and simple cervical and caudal or transforaminal lumbar epidural steroid injections to more complex Spinal Cord Stimulator trials and placement for failed back surgery, RSD, and now recently FDA approved chronic diabetic neuropathy pain.

Metropolitan Pain and Spine loves our Seniors and Our Military, and looks forward to delivering the best of care to those seeking compassionate and competent advanced interventional treatment

Metropolitan Pain and Spine is pleased to announce our Medicare Certified C-Arm equipped Ambulatory Surgery Center for convenient delivery of patient Care!

Metropolitan Pain and Spine

## The scoop of the day

Did you know that the FDA has approved Spinal Cord Stimulation for painful diabetic neuropathy involving the legs and feet!

Spinal cord Stimulation has always been a very effective mainstay in the treatment toolkit of interventional pain management.

The uses of Spinal Cord Stimulation or SCS include the treatment of post spinal pain syndrome and RSD/Complex Regional Pain Syndrome.

SCS is also useful in the treatment of chronic neuropathic pain. One of the forms of chronic neuropathic pain that can be treated with SCS is chronic diabetic neuropathy pain. The FDA has now approved SCS for the treatment of chronic diabetic neuropathy pain.
